v8.0.4.3 3333

1 Job progress

Access the current job list and display current activities.

2 Job status filter

Display jobs by their status.

1) clear filter and show all jobs

2) Job in progress

3) Processed jobs

4) Error jobs

3 Job list

Job list with detailed information. Click on the column name to change the sorting from ascending / descending and vice versa.

1	2	3	4
Job name	Date/Time	Config	Scheme
Bellevue Apotheke_Broschüre A6_02W	2022/06/16 06:18:25	pdf	Standard
DipcoPoster_Format_102_and_105	2022/06/16 06:16:46	pdf	Standard

- 1) Job name
- 2) Date and time
- 3) Workflow name
- 4) Name scheme setup used by the workflow

4

Help

Context sensitive help. Click on it to display the help page for the current UI page.

5

System info

v8.0.4.3  3333

Software version with dongle ID. Click on the dongle icon to show further information about the current license. From here, load a new license or access the about dialog.

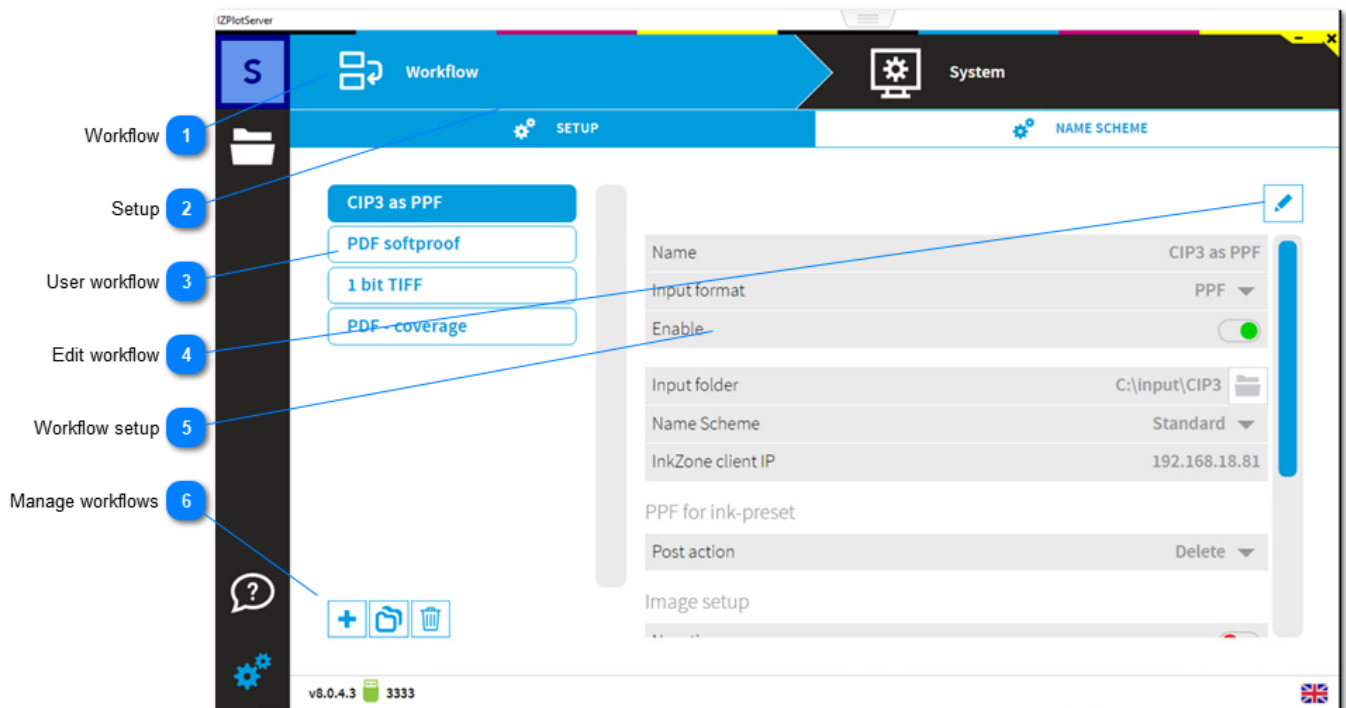

6

Configuration

Change to the configuration area.

1.2. Workflow

1

Workflow

Access the workflow settings from here.

2

Setup

Select setup to show the user workflows.

3

User workflow

List of the user workflows. Each workflow is defined by an input format (PDF, PPF or TIFF), a source and destination folder and further settings. See details in the workflow settings.

4

Edit workflow

Enable edit of the current selected workflow.

5 Workflow setup

The screenshot shows the 'Workflow setup' window. At the top right are a green checkmark button and a blue refresh button. The settings are organized into sections:

- General settings:**
 - 1) Name: CIP3 as PPF
 - 2) Input format: PPF (dropdown)
 - 3) Enable: ☒
- Input settings:**
 - 4) Input folder: C:\input\CIP3 (with folder icon)
 - 5) Name Scheme: Standard (dropdown)
 - 6) InkZone client IP: 192.168.18.81
- PPF for ink-preset:**
 - 7) Post action: Delete (dropdown)
- Image setup:**
 - 8) Negative: ☐
 - 9) Rotation: 0 (dropdown)
 - 10) Mirror: ☐
 - 11) Resolution: 50 (with minus and plus buttons)

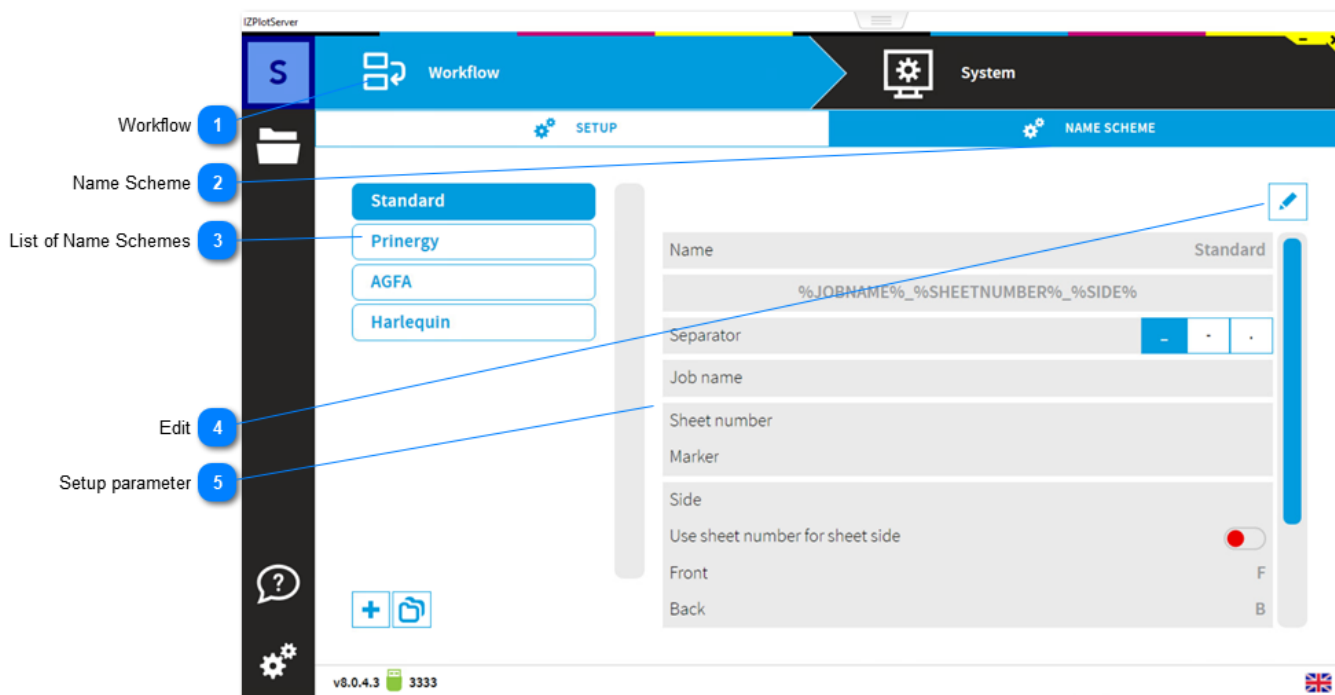

- 1) Workflow name
- 2) Select the input data format: PPF, PDF or TIFF
- 3) Enable the workflow. Job in input folder are processed immediately.
- 4) Select the source folder for the PPF, PDF or TIFF
- 5) Select the name scheme. A name scheme identifies the job name, page number, side etc from the file name.
- 6) Destination PC where InkZone is installed
- 7) Select what should happen with the input data file after the job is processed.
- 8) When the input image data is negative (image after processing is pitch black), enable the negative button.
- 9) Rotate the input image by 90, 180 and 270 degrees
- 10) When the input image data is mirrored (text is there but not readable), enable the mirror button.
- 11) Change the image resolution used for InkZone.

6 Manage workflows

- 1) Add a new workflow
- 2) Duplicate a workflow
- 3) Delete a workflow

1.3. Name scheme

1 Workflow

Access the Name Scheme settings from here.

2 Name Scheme

Select Name Scheme to show the user defined Name Schemes.

3 List of Name Schemes

The individual Name Schemes are accessible from the list.

4 Edit

Enable edit of the current selected Name Scheme.

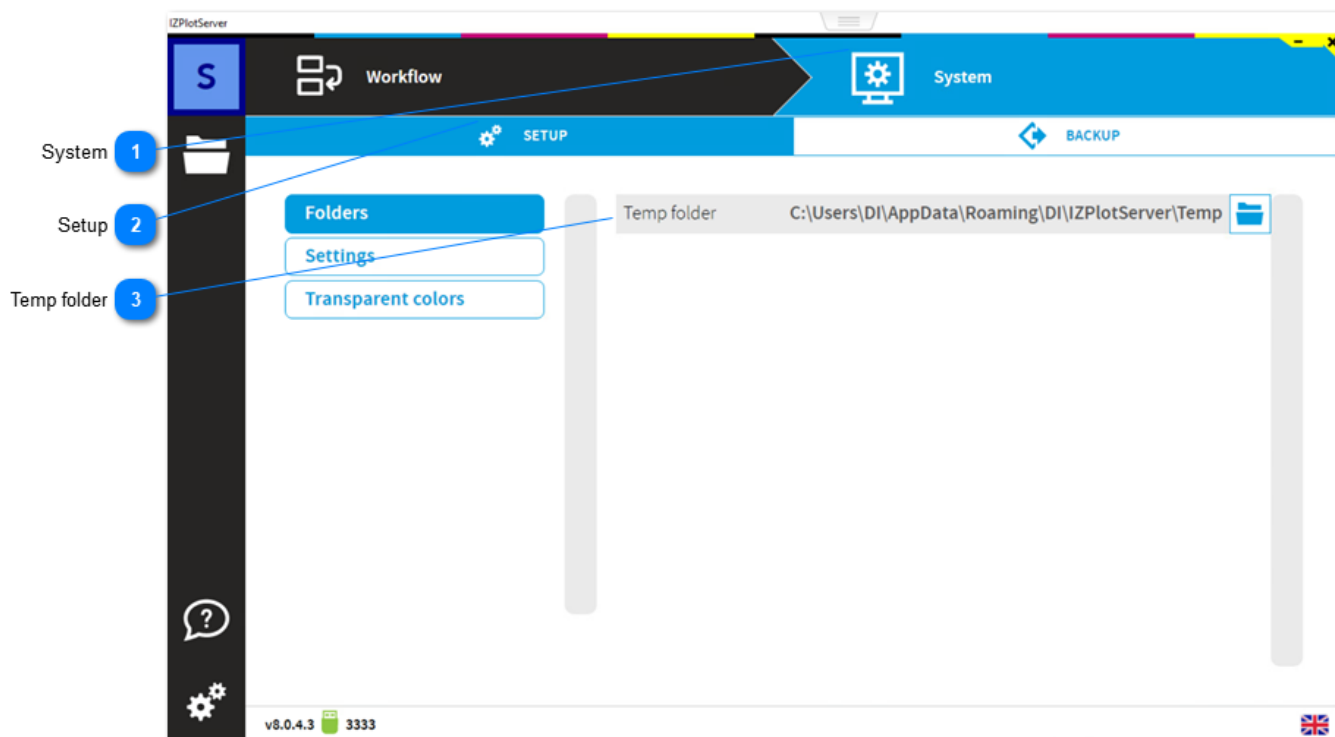

5 Setup parameter

Name	1	Standard
2		
Separator	3	- .
Job name	4	-
Sheet number	5	-
Marker	6	
Side	7	-
Use sheet number for sheet side	8	<input checked="" type="checkbox"/>
Front	9	F
Back	10	B
Ignore	11	+
Color	12	+
Format samples	13	▼

- 1) Define a name for the Name Scheme
- 2) Preview of an universal job name created by the settings below
- 3) Separator character between the items
- 4) Job name, appears in the preview (nr 2) at the selected position as %JOBNAME%
- 5) Sheet number, appears in the preview (nr 2) at the selected position as %SHEETNUMBER%
- 6) Setup the sheet number preceding character, can be empty
- 7) Print side, appears in the preview (nr 2) at the selected position as %SIDE%. See further setting nr 9 and nr 10.
- 8) Use the option when there is no side indicator in the job name itself but the sheet number clearly identifies the front and the back side. E.g uneven sheet number is a FRONT and an even numbers is BACK side.
- 9) Typically for front is a F or FRONT
- 10) Typically for back is a B or BACK
- 11) Part at the end of the job name which should be ignored. Appears in the preview (nr 2) as %IGNORE %.
- 12) When the input format is TIFF, setup a color indicator for the separation, like "_Black", "_Cyan" etc or "_K", "_C".
- 13) Select a name scheme from a list of predefined samples:

Jobname_1A / Jobname_1B	<input type="radio"/>
Jobname_1A / Jobname_2A	
Jobname_001 / Jobname_002 (Front = uneven page nr, Back = even page nr)	

1.4. Folder configuration

1

System

Access the Folders, Settings and Transparent Colors setup from here.

2

Setup

Select Setup to show the settings for Folders, Settings and Transparent Colors

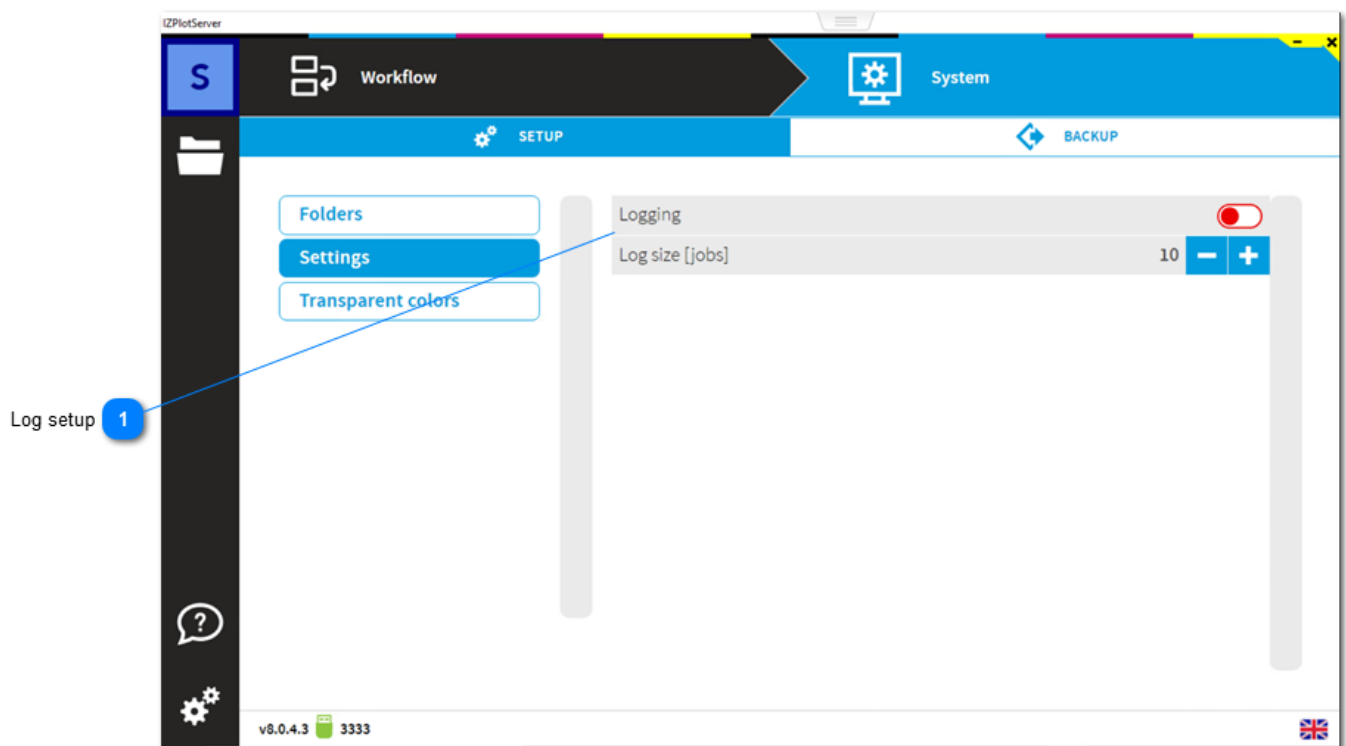

3

Temp folder

Temp folder

Select a folder for the temporary files.

1.5. Log settings

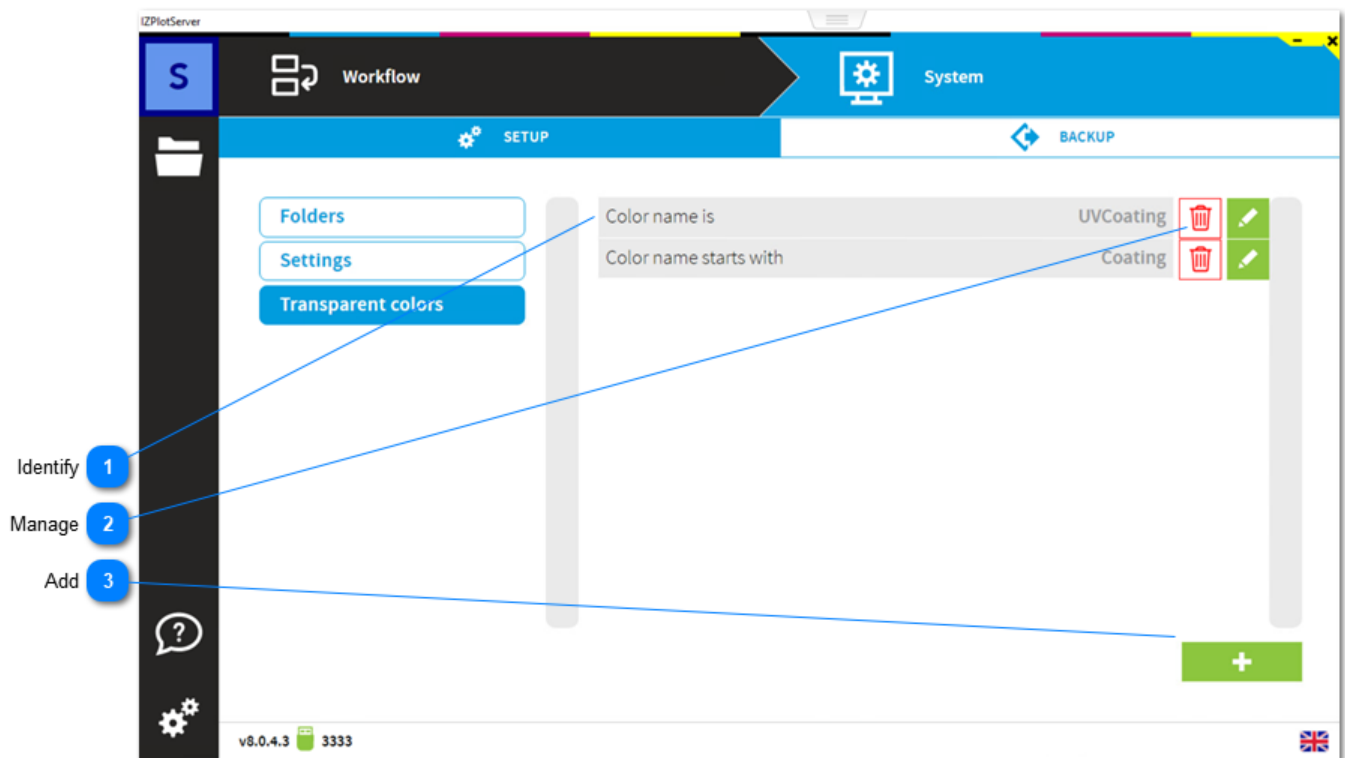

1 Log setup

Enable process logging here. Choose how many jobs are kept before the oldest one is deleted.

1.6. Transparent colors

1 Identify

Color name is

Select from here how a transparent color is identified.

It can be from:

- 1) from its full name
- 2) start with
- 3) ends with

2 Manage

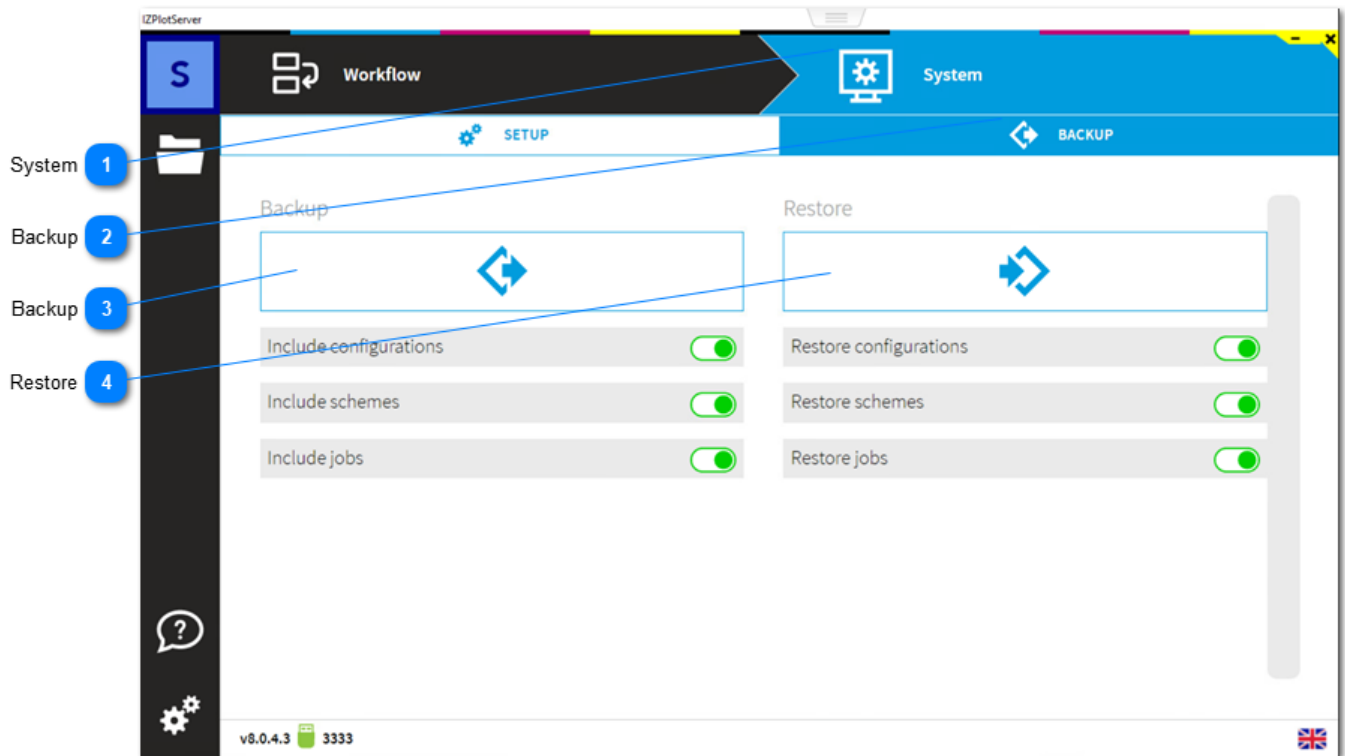

Delete or edit a transparent color setting from here.

3 Add

Add a new identifier

1.7. Backup Restore

1 System

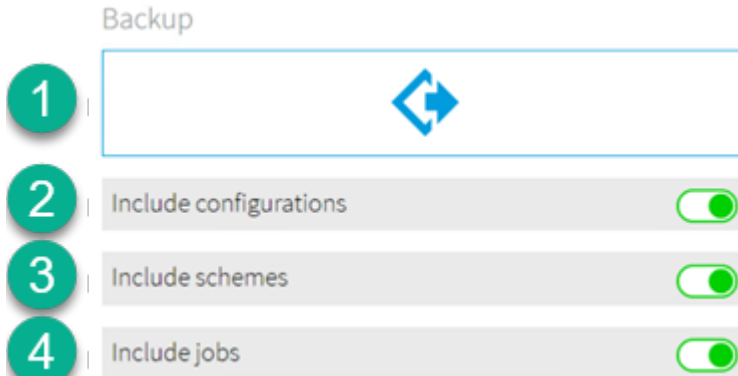

Access the Backup and Restore feature from here.

2 Backup

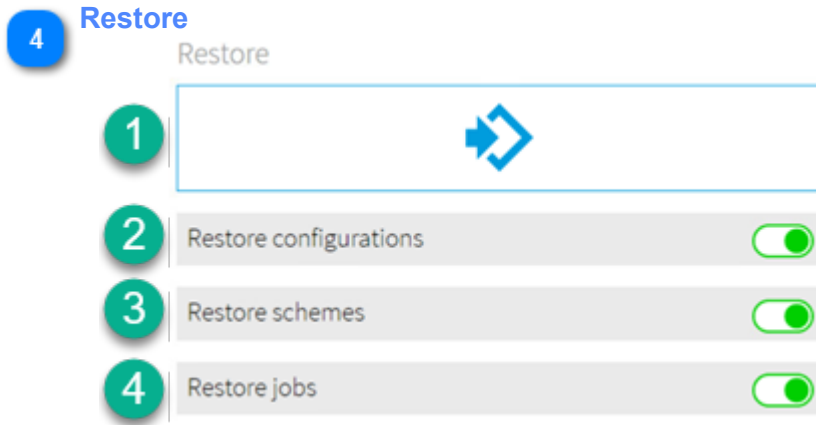

Select Backup to show the Backup, Restore feature.

3 Backup

- 1) Toggle the option below and then start the backup from here
- 2) Option: backup the software configuration
- 3) Option: backup the Name Schemes
- 4) Option: backup the preprocess jobs

- 1) Toggle the option below and then start the restore from here
- 2) Option: restore the software configuration
- 3) Option: restore the Name Schemes
- 4) Option: restore the prepress jobs

FAQ section

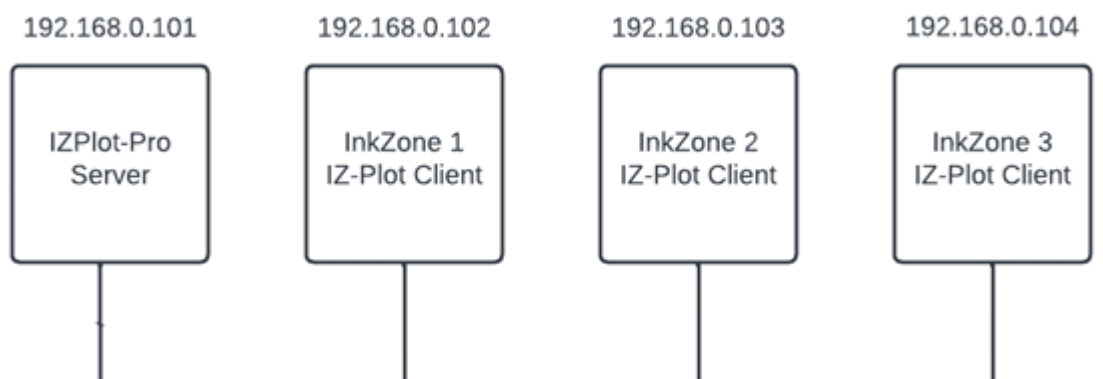

Find here a collection of frequently asked questions.

Installation and Maintenance

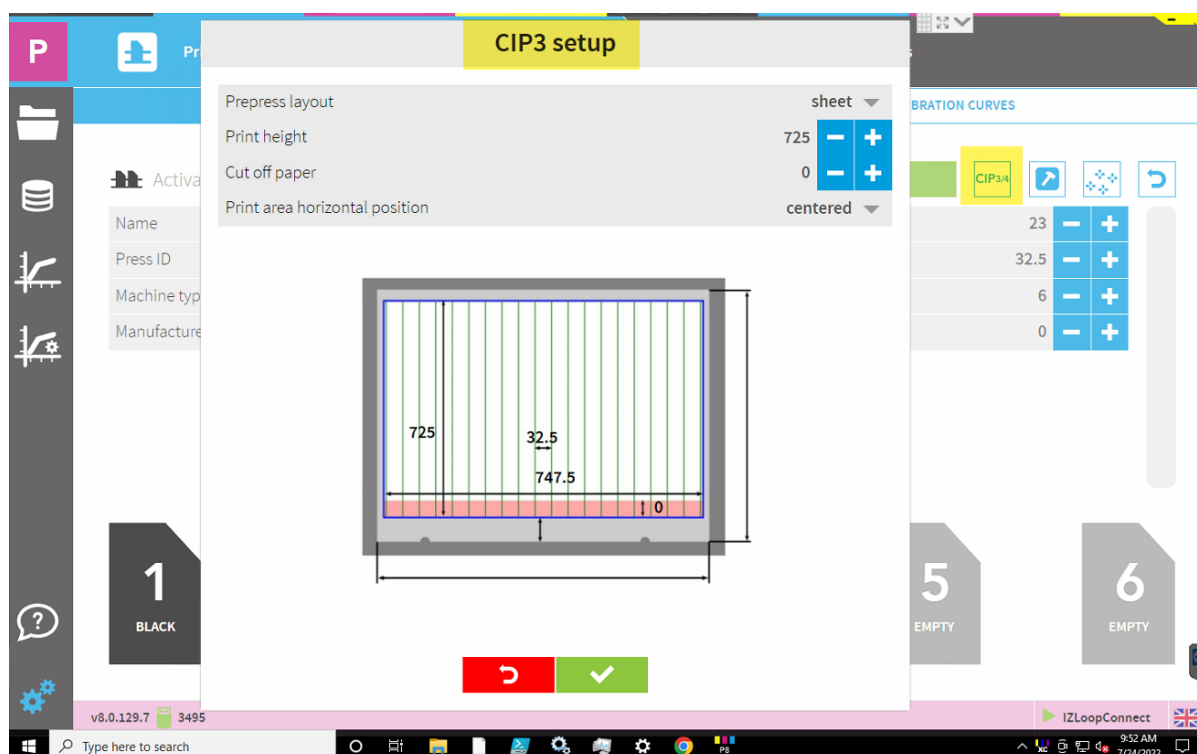

[Installation IZ-Plot Pro - with dedicated PC](#)

[Installation IZ-Plot Pro - same PC as InkZone](#)

Installation IZ-Plot Pro - with dedicated PC

1. Download and install IZ-Plot Server Pro on a dedicated workstation
2. Download and install IZ-Plot Client on the InkZone workstation
3. Setup a workflow: [1.2. Workflow](#)
4. Create a name scheme to match the file names from your workflow: [1.3. Name scheme](#)
5. Configure the press dimension in InkZonePerfect 8. Go to Settings, Printing Conditions, Press. Then select CIP3:

6. Open the IZPlot Client UI with a right mouse click on the IZPlot Client icon:

7. Start IZ-Plot Client

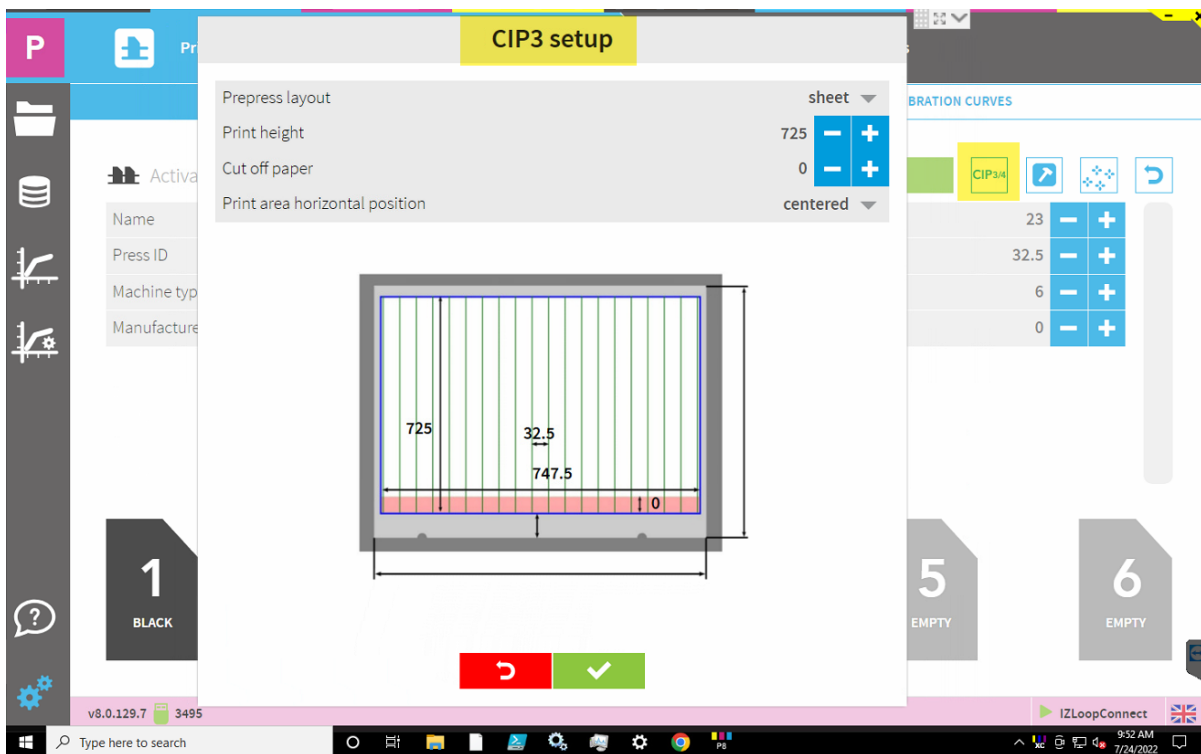

8. Finish
